

SLATE, COPPER & MASONRY CONTRACTORS

ABOUT THE FIRM

Founded in 1919 by William, Nicholas and Charlie Bregenzer, for three generations Bregenzer Brothers, Inc. has specialized in high quality roof and building contracting work. In 1991, Mike Bregenzer took over sole ownership and operation of the family firm from his father Bill Jr. and since then has concentrated on high-end slate and copper roofing work. From their facility in Ewing, equipped with a full complement of slate and copper cutting and shaping equipment, including a computerized metal break and cutters custom designed by Mike himself, Bregenzer Brothers can apply their finely-honed craftsmanship and technical expertise to roofs of any size and level of difficulty.

The technical range and artistry of their copper and slate roofing and exterior work is evident on many buildings in the area. Bregenzer Brothers has installed roofs for various buildings on the Princeton campus, including the University's new residential college, Whitman College. Bregenzer Brothers can bring to completion the most demanding jobs with assurance.

SLATE, COPPER & MASONRY CONTRACTORS

Whitman College at Princeton University, a new residential college hall which opened in the fall of 2007, was one of the largest, most technically demanding copper and slate roofing jobs undertaken by Bregenzer Brothers, Inc. Over 15 months they custom built and installed the 110,000 square foot slate and copper roof ranging over multiple buildings surrounding two large outdoor quadrangles. The job required 467 tons of slate and 30 tons of copper, and included exterior work over 104 dormers, flashings, a full network of drainage pipes and leader heads, plus other custom building details, large and small, from custom-fabricated chimney caps to handmade brass exterior finishing nuts.

PROJECT: WHITMAN COLLEGE, PRINCETON, NJ

A FEW OF OUR COMPLETED PROJECTS

1. Patterned Slate Roof - Humanities Building, Princeton University
2. Custom Copper Leader Head, Princeton University
3. Custom Ridge - Humanities Building, Princeton University
4. Standing Seam Roof - Village Charter School, Trenton
